David,

Enforcement activities will be directed towards the area that contains the mines previously provided (please add NM0084 to that list). From my understanding, the enforcement funds are intended to be used to support enforcement actions, and ultimately tie possible responsible parties with the contamination/release. My apologies for the delayed response.

Thanks,

-Stephen

Stephen: From discussion yesterday with Kevin, I understand that EPA's expectation for use of the enforcement funds grant to NMED is that the funds are to be used for assessment and characterization work within the indicated area in support of possible enforcement action. Your email to Dana below appears to further specify a subset of the individual mines within the area shown to which our activities should be directed. (i.e., NM0070, NM0044, NM0085, NM0083, NM0045, NM0049, NM0090, NM0103, NM0054/96, NM0068, NM0089 and NM0060). **Please confirm. Thanks.**

Subject: A6K600NS - Mine numbers in the focus area

Dana,

I'm following up on the conference call from last week. Attached is an enforcement map within the study area. The map contains the mines that have historic operators still in existence today (in one form or another). These mines include: NM0070, NM0044, NM0085, NM0083, NM0045, NM0049, NM0090, NM0103, NM0054/96, NM0068, NM0089 and NM0060.

The map is based on Enforcement research using historic and last operator

information obtained from the AUM Inventory Database.

Regards,

Stephen Capuyan
